Secondary School IT Policies:

1. Students need to read and agree to the Secondary Student Handbook, Appendix 4. If a student has any questions, they may discuss with either the IT Department or the divisional principal.
2. If students forget their device or any accessory (e.g. a charger) at home, IT will NOT provide loaner Apple devices. If a student is having a device repaired, IT may be able to provide a loaner device, provided that one is available. Students are ultimately responsible for their devices, and ISQ bears no responsibility for lost, stolen, or damaged technology.
3. ISQ offers Office 2016 through the Office365 subscription. Students may install any other programs onto their devices, provided that they do not violate the Student Handbook. IT provides on-site service for any school related issue. Students are responsible for paying for any replacement parts on their computers.

For any further IT questions, please contact IT department via helpdesk@isqchina.com, stop by the IT Office (Room 204) in person, or dial extension 72040.
